

Rok Cooking Introduces New Hot Rock Home Cooking Set

Rok Cooking introduces their new hot rock home cooking set (model HCS-101C) that comes with a sleek new porcelain plate and cooking rock with honed finish.

San Jose, CA ([PRWEB](#)) September 08, 2011 -- Rok Cooking's new [hot rock](#) Home Cooking Set comes with a porcelain plate that has a lower profile, sleeker and more elegant design. The plate's side compartments have been redesigned for ease of use, providing one larger compartment ideal for side dishes and a smaller compartment perfect for dipping sauces.

The new set includes a cooking rock that comes with a honed or satin-like finish. The honed finish is very smooth but duller than the previous polished finish giving it a more natural and rugged look. The new and improved set has an MSRP of only \$69.95 each.

Steve Wright, President of Rok Cooking, says, "Our new Home Cooking Set makes eating hot rock meals at home even more enjoyable while retaining all the benefits of being healthy, delicious, hot to the last bite, and a whole lot of fun." Hot rock or [hot stone cooking](#) has never been more accessible and affordable to consumers all over the world.
